

The Lyons Companies conducts environmental, health and safety reviews on all products used throughout our facilities. Products used from the manufacturing floor, office and janitorial and maintenance operations are evaluated for environmental impact and employee safety. Over the past several years, we have replaced potential hazardous products with safe nontoxic materials.

We have eliminated all hazardous materials from our waste water and are certified with the minimum testing requirements in our area.

We are an EPA certified Small Quantity Generator.

Lyons Store Fixtures is dedicated to continuous improvement systems to eliminate waste from all areas of manufacturing.

## MATERIALS

- All steel contains a percentage of recycled material varying from supplier and type.
- 100% of all paint is powder-coating, eliminating harmful emissions and hazardous waste water.
- Laser cutting technology, robotic welding and automated bending equipment are utilized to reduce scrap.
- All steel offal is sorted by material and 100% is recycled.
- All wood is recycled. This includes offal and damaged crating material.
- Bumpers and plastic components are made from recyclable plastics.
- We offer our customers the choice of formaldehyde-free substrate materials creating products that are 100% recyclable.
